

ATLAS SINCE 1919

ATLAS ACCESSORY EQUIPMENT for excavators

ACCESSORY EQUIPMENT

PRODUCT RANGE

MOBILE EXCAVATORS

ATLAS mobile excavators are the all-purpose excavators for road construction and underground engineering work. They are enormously strong, solid and mobile and can be operated effectively in virtually all kinds of conditions.

- Excellent stability for maximum performance
- Optimal centre of gravity and ideal weight distribution
- Precise digger control with a sensitive hydraulic system
- Streamlined for trench work, strong design and construction

RAIL-ROAD EXCAVATORS

The ATLAS Rail-Road Excavators are adaptable and flexible: the new computer-aided CARSY system ensures optimal contact pressure with the rails. They can be used for an array of applications, from cutting works to dismantling and upgrading the railway track.

- More than 30 years manufacturing experience
- Optimal stability - Allows easy railing / de-railing and convenient handling for operators
- Versatility
- Mechanical Expertise
- Security
 - Automatic self-diagnosis
 - Emergency de-railing is permanently available and double protected on rail guide wheels
 - Fast cycle times
 - Optimised handling

MOBILBAGGER

Die ATLAS Mobilbagger sind die Universalbagger beim Straßen- und Tiefbau. Ihre enorme Kraft, Standfestigkeit und Mobilität ermöglichen ein effektives Arbeiten unter nahezu allen Einsatzbedingungen.

- Maximale Leistung dank exzellenter Stabilität
- Optimaler Schwerpunkt und ideale Gewichtsverteilung
- Präzise Baggersteuerung über feinfühliges Hydraulik
- Optimiertes Design für Grabarbeiten, robuste Konstruktion, Bedienerfreundlichkeit

ZWEIWEGBAGGER

Die ATLAS Zweiwegebagger sind anpassungsfähig und flexibel: Das computergestützte CARSY System gewährleistet optimalen Anpressdruck auf die Schienen. Die Bagger sind vielseitig einsetzbar, von Böschungsarbeiten bis hin zu Modernisierung von Gleisanlagen.

- Mehr als 30 Jahre Erfahrung
- Optimale Stabilität
 - Ermöglicht leichtes Auf- und Abgleisen
 - Bequeme Handhabung für den Bediener
- Vielseitigkeit
- Know-how in der Konstruktion
- Sicherheit
 - Automatische Selbstdiagnose
 - Notausgleisung immer gewährleistet und doppelt abgesichert
 - Schnelle Zyklen
 - Hohe Bedienerfreundlichkeit

PRODUCT RANGE

MATERIAL HANDLING MACHINES

ATLAS material handlers include mobile industrial machines and industrial tracked machines, which work on applications such as scrap, wood, bulky goods, special recycling, port applications and vacuum operations.

- Fast cycle times
- Optimised handling
- Mechanical expertise
- 20 years manufacturing experience
- Reliability
- Extended life span
- Versatility
- Range of diverse equipment to meet customer expectations

CRAWLER EXCAVATORS

Maximum digging performance, large loads and superior tear-out and break-away forces thanks to excellent kinematics. Maximum power with Cummins high-performance engines. Fast, sensitive working cycles with a newly-developed Rexroth hydraulic system.

- Powerful
- Fast operating cycles
- Easy to operate
- Low fuel consumption
- Easy maintenance
- Excellent visibility

UMSCHLAGMASCHINEN

ATLAS Lademaschinen sind mobile Umschlagmaschinen und Umschlagmaschinen mit Raupenfahrwerk für den industriellen Einsatz bei z.B. Schrott, Holz, sperrigen Gütern und Recycling, in Häfen und bei Spezialarbeiten.

- Know-how in der Konstruktion
- 20 Jahre Erfahrung
- Schnelle Zyklen
- Hohe Bedienfreundlichkeit
- Zuverlässigkeit
- Lange Lebensdauer
- Vielseitigkeit
- Große Auswahl an Zusatzausrüstungen

RAUPENBAGGER

Optimale Grableistung, hohe Traglasten sowie überlegene Reiß- und Losbrechkkräfte durch sehr gute Kinematik. Maximale Leistung durch Cummins Hochleistungsmotoren. Schnelle und feinfühligere Arbeitsspiele durch neuentwickeltes Rexroth-Hydrauliksystem.

- Leistungsstark
- Schnellste Arbeitszyklen
- Hohe Bedienfreundlichkeit
- Niedriger Kraftstoffverbrauch
- Perfekte Wartungsfreundlichkeit
- Optimale Rundumsicht

5	Quick change devices (QCD)
6	Quick change devices for changing the grab with a grab - as well as Oil Quick and Verachtert
7	Articulation pieces - quick change, grab adaptations - Verachtert - Lehnhoff - Oil Quick
8	Articulation pieces - permanent installation
9	Grab rotation gear
10	Hydraulic packages - Grab extensions
11	Clamshell bucket for E4.2
12	Clamshell bucket for E8.2
13	Clamshell bucket for E11.2
14	Clamshell bucket for E12
15	Clamshell bucket for E32
16	Clamshell bucket for E31.2
17	Clamshell bucket for E332
18	Rail tongs for E332
19	Clamshell bucket for E332
20	Clamshell bucket for E2.62
21	Clamshell bucket for E732-2 and E832-2
22	Log grab for E32
23	Log grab for E732 and E832-2
24	Grapple and grab for round shafts for E32 - Beet grab for E332
25	Demolition and sorting grab for E332, swinging freely and with a screw adaptor
26	Multi-jaw grab, 5 arms, for E11.32 and E732
27	Multi-jaw grab, 4 arms, for E732
28	Multi-jaw grab 5 arm für E732
29	Multi-jaw grab, 4 and 5 arms, for E832-2
30	Connecting part for hydraulic hammer - connecting plate for welding - adaptors
31	Product line of dippers and buckets
32	Attachments for a dipper: AB 1004, 1104, 1204
33	Bucket: standard design with ATLAS B1 tooth system or a non-serrated blade
34	Quick change connectors from other manufacturers suitable for backhoe bucket - additional prices
35	Rock bucket - HD-design with wear plates and ATLAS B2 tooth system
36	Rock bucket - HD-design with wear plates and ATLAS B3 and B4 tooth system
36	Rock bucket - HD-design with wear plates suitable for 210 - 260LC with CAT tooth system
37	Drainage bucket; trench lining bucket, dipper for loamy soil
38	Trench digger: rear blade, fixed
39	Trench digger: rear blade, swivel movement available
40	Trench digger, bucket shape with rear blade and fixed to the ground or swivelling
41	Multi-purpose bucket, bucket shape without rear blade, fixed or swivelling
42	Quick change connectors from other manufacturers suitable for trench digger - additional prices
43	SWINGOTILT
44	Ripper tooth, heavy duty fork, load hook, capable / incapable of rotation
45	Pallet forks , original load-lifting magnets MOZELT
46	Michaelis mowing bucket

Quick change devices (QCD)

suitable for articulated jibs with a dipper-tipping cylinder and a reverse gear for changing the dipper (bucket) with a dipper (bucket), the bucket with a grab or the grab with another grab

Material No.	Type designation	Arm width (mm)	Bolt Ø	with ... T load hook	Recommended excavator size	Weight (kg)

Product line of dippers and buckets

The product line of dippers and buckets of ATLAS offers different forms of buckets, capacities and widths for any kind of application, optimally adapted to the relevant carrier:

- Bucket
- Rock bucket
- Trench lining bucket
- Dipper for loamy soil
- Heavy duty fork
- Drainage bucket
- Trench digger
- Multi-purpose dipper

In accordance with the relevant dimensions of the articulated jib ends, the product line of buckets and dippers is divided as follows:

- Dipper attachments for articulated jib end 168 mm (closed) / Ø 50 mm
- Dipper attachments for articulated jib end 268 mm (closed) / Ø 60 mm
- Dipper attachments for articulated jib end 300 mm (closed) / Ø 80 mm
- Dipper attachments for articulated jib end 311 mm (closed) / Ø 80 mm

ATLAS buckets and dippers meet the requirements of the civil engineering:

- The grade of the steel and the special design guarantee stability and wear resistance.
- All parts particularly subject to wear as floor and side blades as well as the floor panel are made of high-strength surface-coated fine-grain structural steel.
- Easy penetration is provided by the free punch due to the slightly conical shape of the dipper. Teeth holders feature flat design and are incorporated in the blade. Flat design provides less digging resistance and high efficiency, for example when unloading, i.e. more work cycles.

For the different types of soil we provide teeth of different shapes:

Attachments for dippers

The buckets and dippers are suitable for all kinds of typical application, incl. when high tearing forces are required as for rock breaking off and other demolition works. Teeth are internally welded on and with replaceable tine tips.

Tieflöffel für ATLAS 1004, Zähne innenliegend angeschweißt, auswechselbare Zinkenspitze ATLAS Z2

SWINGOTILT

The SWINGOTILT with 2 double-acting cylinders can be swivelled 2x40 ° and rotated 360 ° endlessly

Material no.	Type designation	Suitable for arm width and bolts, Ø (mm), SWE (quick change device)	Recommended excavator size	Weight (kg)
6197760	ST15-T620 o.Mg.V.	T620V/T620H	10 - 15 t	400
6196620	ST18-T620 o.Mg.V.	T620V/T620H	14 - 18 t	500
6206895	ST22-T620 o.Mg.V.	T620V/T620H	16 - 22 t	620
6145950	ST15-22 HP	Hydraulic package	T620V/T620H	11

Hydraulic mounting kits on the machine are required:

Two-way

6181511 Hydraulic mounting kit Comfort: Tool control for 16 different working tools via potentiometer adjustable from the cab (e.g. flail mower, mowing bucket, branch cutter, vibration bear, hydraulic hammer). Consisting of pressure compensation valve with electronic control for oil quantity and pressure.

3082106 Hydraulic attachment kit, for K-sorting grab, piping up to the tip of the shaft

Mobile

6191510 Hydraulic mounting kit Comfort: hammer, shears, sorting grab plus additional circuit for 2 articulated arm or SWINGOTILT. Operation via rocker in left joystick. Joystick steering is not possible with this option. Dozer blade operation Standard.

Michaelis mowing bucket

Material no.	Type designation	Cutting width	Oil level (constant)	Maximum permissible pressure	Recommended excavator size	Weight (kg)
	M 2200 G	2,20 m	22 l/min	180 bar	ab 10 t	420
	M 2500 G	2,50 m	22 l/min	180 bar	ab 10 t	490
	M 3000 G	3,00 m	22 l/min	180 bar	ab 10 t	610
	M 4000 G	4,00 m	32 l/min	180 bar	ab 10 t	740
	M 5000 G	5,00 m	48 l/min	180 bar	ab 10 t	950

(*) The weights of the bucket carriers vary depending on the type and construction of the excavator.

- For mowing work on slopes and bottom with simultaneous removal of the mowed material
- High cutting performance via gear drive
- Wear-resistant bearings and components
- Central lubrication
- Proven Michaelis cutting unit with protrusive finger bar and floating blade

The holders (bucket carriers) are available to fit the respective excavator model or the eventually existing quick-change device. Special dimensions are also available. According to the kinematics data of your excavator, we design the optimum opening angle for the mowing bucket.

The bucket carrier is swinging. The pendulous movement is damped by two rubber buffers, which results in a good adaptation to the soil conditions.

Possible accessories

Left:
silt sheets and detachable side panels

Right:
finger skids

- Work attachments - Manufacture at the factory in Vechta

Assembly station - rotation gears-

Each rotation gear is checked here before distributing to the dealers

Final assembly station of the grabs - customized assembly -

Christmas in Vechta

Loading for distributing to the customers

The right tool

We manufacture our tools in standard and special models based on the most current know-how in the fields of machine and steel construction. High-strength steels, tried and tested with century-long experience in this industry are guarantees for cost-efficient and practical work.

Capable service partners. The customer service employees of our dealers are highly trained in the technology in our factory in order to be qualified contacts for you at all times.

EASY. FAST. RELIABLE.

THE RIGHT TOOL

We manufacture our tools in standard and special models based on the most current know-how in the fields of machine and steel construction.

High-strength steels, tried and tested with century-long experience in this industry are guarantees for cost-efficient and practical work.

CAPABLE SERVICE PARTNERS

The customer service employees of our dealers are highly trained in the technology in our factory in order to be qualified contacts for you at all times.

THE BEST SUPPORT

With our AEM system, you also have a reliable partner for servicing. The service menu with maintenance-interval and measurement-data display stores all required information.

A diagnostics interface in the driver's cab for the connection of a laptop enables the easy readout and configuration of the AEM system.

DAS RICHTIGE WERKZEUG

Wir fertigen unsere Werkzeuge in Serien- und Sonderausführungen nach modernsten Erkenntnissen des Maschinen- und Stahlbaus. Hochfeste Stähle, bewährte Technik und jahrzehntelange Erfahrung sind in diesem Sektor Garanten für kostengerechtes und praxisnahes Arbeiten.

KOMPETENTE SERVICEPARTNER

Die Kundendienstmitarbeiter unserer Händler werden intensiv im Bereich Technik in unserem Werk geschult, um für Sie jederzeit ein kompetenter Ansprechpartner zu sein.

BESTE UNTERSTÜTZUNG

Mit unserem AEM-System haben Sie auch bei der Wartung einen verlässlichen Partner.

Das Service-menü mit Wartungsintervall- und Messdatenanzeige hält alle erforderlichen Informationen bereit. Eine Diagnose-Schnittstelle in der Fahrerkabine zum Anschluss eines Laptops ermöglicht das leichte Auslesen und Konfigurieren des AEM-Systems.
